

Sick Cat Symptoms - Recognize the Signs of a Sick Cat

By [Tim Bock](#)

To many peoples pets are part of the family. It's never fun when a family member isn't feeling well. How can you tell if your cat is sick? You don't need to be a doctor to recognize the common symptoms. Cats may have some of the same symptoms as humans when they aren't feeling well. Some of these common symptoms include:

Cough: Just like humans, cats also cough. An occasional cough is normal, however if it persists for more then a week you may want to get it checked out.

Loss of weight: Being sick will affect your cat's appetite. This might cause unexpected weight loss. If your cat starts to loose a lot of weight quickly, take him to the doctor right away.

Loss of energy: Sick cats are generally lethargic. If you notice your cat not playing as much as it used to or sleeping more then normal, you may have a sick cat on your hands.

Fever: Does your cat feel warm? Is it constantly shivering? It may have a fever which is a sure sign its sick.

The severity of all these symptoms may vary to mild to extremely severe. If they get too bad you should take your cat to the vet. He'll be able to determine if medication is needed. In some cases, it may be a sign of a more serious problem such as disease.

It's always a good idea to use some good old fashion "preventable medicine". By making sure your cat has all of its shots you'll be able to lessen the chances of serious illness.

Don't wait till it's too late. You need to read: [Cat Care Symptoms](#) as soon as possible. This is an excellent article that will tell you all you need to know about taking care of your cat, so it doesn't get seriously ill. <http://www.easycatcaretips.com> is dedicated to helping people take care of their cats.
